CATALOGUE NO. 5 **SUMMER, 1973**

TERMS OF SALE: All coins are available on approval to customers known to us. New customers should provide references and allow a few days for checks to clear our bank. On approval orders, payment should be sent within three days. All coins are guaranteed as described, and we allow a full week's return privilege. Orders under $10.00 please add 35¢.

POSTAGE AND INSURANCE: We will pay postage on all domestic orders received with payment. Approval buyers will be billed for postage and insurance. Overseas orders will be billed for postage, registration, and insurance. Payment in US dollars only.

GRADING: Determining the condition of a coin is not an exact science, but we do endeavor to be accurate in describing the coins we offer for sale. Order with confidence. Most of our customers feel our grading is very conservative. We guarantee that none of our coins has been repaired, whizzed, or plugged. Collectors returning coins as misrepresented will be refunded their postal expenses on request

All coins are subject to prior sale. We appreciate alternate choices and guarantee they will only be used as such.

Collectors desiring to place orders via telephone should note that we will be traveling a major portion of this summer. During the month of June, our Smyrna number will be connected to an answering service during periods of our absence. The persons at that service can only receive orders and accept inquiries. Beginning July 1, telephone calls may be directed to Scott Cordry, person-to-person, in San Diego, California (telephone F14-442-4145). PLEASE NOTE THAT ALL CORRESPONDENCE PERTAINING TO THIS PRICELIST AND OTHER MATTERS WILL BE RECEIVED AT OUR SMYRNA ADDRESS.

Our next regular pricelist will be issued in mid-August or early September. We do thank our clientele for making our first season as CCI a successful and rewarding time.

HAVE A PLEASANT SUMMER

THE COINAGE OF CENTRAL AMERICA

Beginning with cob coins or "macuquines" as they were called by the populace, Guatemala was the first mint to strike coins specifically for the countries of Central America. These pieces were struck under Spanish colonial rule beginning in 1733. With the exception of proclamation "coins," medals that circulated, none of the other Central American nations struck coinage prior to their independence from Spain (Mexico is properly considered to be in North America.)

Beginning, however, shortly after 1821 and continuing until now, a rich variety of coins, counterstamps, tokens, and medals have been produced in these countries. The first thirty years of independence were rather chaotic for the area; resultingly many of the coins struck were low-production provisional issues. The major exception was the coinage produced under the name of the Central American Federation. These pieces were beautifully designed and generally well-struck. As the federation rapidly proved itself inoperative, an interesting series of counterstamps and tokens became a major portion of the circulating hard currency. Many of these counterstamps were struck to nationalize the large quantity of foreign monies then circulating.

Beginning in the decade 1850-1860, the coinages of each of the individual countries became a reflection of the flavor of the particular region. To describe those coinages collectively would be an inaccurate appraisal of their individual charms and tendencies. Therefore we offer the following comments about each individual series or group.

PATTERNS AND TRIAL STRIKES: Unlike some European countries, the Central American nations produced relatively few pattern pieces. Most of the fairly common pieces in this series are of European origin and may have been attempts by private mints in Europe to solicite business. Most trial strikes are rare.

GOLD COINS: Excluding recent issues, there is a very small number of Central American gold coins that are available in quantity. The gold series of Guatemala and Costa Rica are somewhat extensive with many pieces being available to the collector of moderate financial means. Nearly all issues of Salvador and Honduras are rare.

BRITISH HONDURAS: Beginning with the "GR" counterstamps of 1810-1820 and continuing through the coinage of the mid-1960's, there is a large number of coins from this country that are very scarce in superior condition. With most mintages being under 60,000, this series offers a severe challenge to the quality-minded collector. Most dates are frequently available in very worn or corroded condition however.

COSTA RICA: The coinage of this country offers a rich variety of scarce and rare types, dates, counterstamps, and varieties. There are several unusually attractive designs and a number of coinage style changes that add to its appeal. Nevertheless, relatively few collectors have undertaken the enormous challenge that this series offers by date, or even by type.

GUATEMALA: Having suffered through many coinage law changes and shortages, the coinage of Guatemala offers one of the most complex, varied, and interesting series to study and collect. Collectors will find few series that have so many different items, most of which can be obtained in circulated condition for very small premiums. There are many yet unappreciated rare dates in this series.

HONDURAS: If you reread our comments about Costa Rica and Guatemala, add them together and multiply by 2, you will have an idea of the intrigue of this series. Few persons have attempted to collect this coinage as it contains many rarities. We should warn that unlike Canadian and USA rarities, many of these coins are simply unavailable to all but the most searching collecor.

NICARAGUA: A relatively modern series with no rare or truly scarce types. Superior condition coins of certain dates are very rare.

PANAMA: The subject of more speculation and manipulation than the composite remainder of these series. Nonetheless, there are several very scarce and attractive issues in superior condition.

SALVADOR: Although the modern series is comparatively sparse, the provisional and counterstamped coins of Salvador reflect the uncertainty and novelty which give romantic flavor to the entire Central American series. As can be readily noted from our tentative listing of counterstamped and provisional types, the early coinage of Salvador presents a legitimate challenge to the true numismatist.

767 17058

THE COINAGE OF CENTRAL AMERICA

SECTION I: PATTERN ISSUES AND TRIAL STRIKES

*1. Guatemala Peso 1894. Unlisted trial piece. The obverse has the standard design of the 1894-7 Peso (Elizondo type 20; Y84.) The reverse is the type of 1888-93 (Elizondo type 19; Y58a.) Authenticated by the author and researcher of the standard catalog of Central American coins. This piece was struck in the Guatemala mint upon receipt of the new dies from Paris. The new obverse design was tested in the press in combination with an obsolete reverse to minimize the chance of damage. Struck in soft copper, this piece was silver plated for presentation. Due to improper preservation, this specimen shows evidence of corrosion and other surface damage. Although impaired, its appearance is of less consequence than its historical and numismatic importance. 19.12 gm $500.00

2. HONDURAS: Provisional Peso 1862A Y-P1. Appears to be bronze whereas the regular issues are copper. PATTERN issue with stars by the date. 2.74 grams. Nearly UNC, attractive..... 75.00

*3. HONDURAS: 1862 Provisional Coinage PROOF SET. This set is comprised of 4 coins struck in bronze: 8 Pesos (24.75 grams, 40 mm), 4 Pesos (15.15 grams, 33 mm), 2 Pesos (6.63 grams, 25 mm), and 1 Peso (2.82 grams, 19 mm). These proof issues were definitely struck in England and differ noticably from the regular issue specimens. The most definitive difference is that the date of the patterns is flanked by stars, with rosettes outside the mintmark and assayer initial. The regular issues have dots instead of the stars and rosettes. The proof pieces have more refined lettering on both obverse and reverse than do the regular issues. They also have smaller trees with lusher foilage, smaller numeral-letters for the denomination, fuller cornucopias, more refined waves below the pyramid, a rosette instead of a dot in the reverse circles, and numerous other minor die differences. The regular issues are struck in copper rather than bronze. The proof and regular issues have the same diameters except for the 4 pesos (regular issue is 32 mm, pattern proof a full 33 mm.) The weights differ considerably however. Our regular issue set is too worn to accurately fix the weight upon striking, but it does indicate a probable progression: 1 Peso= 3.51 grams, 2 Pesos= 7.08 gms., 4 Pesos= 14.00 grams, and 8 Pesos= 27.13 grams. The proof issues are lighter than the regular issues except for the 4 Pesos which is heavier (because it is larger) than its counterpart.

Until recently, it was accepted that while the patterns were struck in England, the regular issues were coined in Tegucigalpa, Honduras. The location of the striking of the regular issues is now being questioned and will probably not be settled for some time. It is interesting to note the "H" (presumably Heaton, England) on the bush to the right of the tree on the regular issue 1 Peso.

A final point that must be discussed is the original intent of these issues. For decades specialists assumed that they were patterns for gold coins since their denominations paralleled the gold coin denominations of the era. Zelaya, however, published data indicating that an official decree called for these "provisional copper coins." The wear and circulation marks on most regular issue specimens support Zelaya's contention that they are regular circulation coins.

This set is of major importance in ascertaining the history of the coinage of Honduras. It was obtained from the LORD GRANTLEY COLLECTION (auctioned by Glendenings in London in the early 1940's.) Accompanied by a regular issue set (in VF or so,) it is mounted in a custom plastic holder. One of two or three such sets known, we proudly offer the eight pieces for just..... $1500.00

*4. HONDURAS: 10 Pesos 1871 Pattern in Copper for the rare Gold issue, (Friedberg 1.) 9.71 gm, 27 mm. Toned AU-UNC, wire rim extends above surface by over a full millimeter at one area on the reverse. NOT IN GUTTAG and RARE. Ex-Prober Collection..... 150.00

8

9

*5. NICARAGUA: "ESSAI DE MONNAIE" 1892. White metal, non-magnetic. Probably Guttag 3941. 4.13 grams, 19 mm. PROOF, minor reverse stains..... 40.00

*6. NICARAGUA: PATTERN Un Centavo 1892. White metal, non-magnetic. Probably Guttag 3944. 3.89 grams, 19 mm. PROOF, some reverse tarnish stains..... 42.50

*7. NICARAGUA: PATTERN 2 Cents 1887E. Guttag 3939. 10.53 grams, 30 mm. Toned AU-UNC..... 37.50

*8. SALVADOR: BARRIOS 25 Centavos 1861. Guttag 4578. Brass, 24.8 mm, 8.97 grams, 8.62 sp. gravity, 2.33 mm thick, reeded edge. EF-AU, some lustre and small surface marks on face. A RARE PATTERN of which a VF with minor defects was offered by Jess Peters in his World Patterns Catalog of August 1971 for $800.00. Albeit not perfect, this piece is the nicest of the four we know to exist..... 600.00

*9. SALVADOR: BARRIOS 25 Centavos 1861. Non-magnetic Nickel alloy, possibly German silver or copper-nickel. Probably not plated as such would have worn off. 24.8 mm, 5.64 grams, 8.95 sp. gr., only 1.6 mm thick, reeded edge. Very Fine or so, considerable even wear, but all details evident and no defects. Not previously known to us in other than brass. Given the several-metal strikings of the Peso, it is, however, no surprize. CERTAINLY VERY RARE..... 750.00

*10. SALVADOR: BARRIOS Peso 1861. Guttag 4577. Copper, plain edge, 36.5 mm, 20.41 grams. Uncirculated, some evidence of handling. Unquestionably genuine due to a peculiarity different from the recent forgeries (this fact can be confirmed and is not further discussed here in order to keep from enlightening the source of the restrikes.) Plain edge variety listed as "may possibly exist" in recent Almanzar-Stickney booklet. The existence of the restrikes cannot diminish the RARITY of this piece..... 675.00

*11. SALVADOR: BARRIOS Peso 1861. Guttag 4577A. Aluminum, PLAIN edge (the Guttag piece had reeded edge,) 6.62 grams, 36.5 mm. EF+, very scarce. A genuine specimen with the tell-tale mark..... 200.00

*12. SALVADOR: 25 Centavos 1893. Silver, 6.02 grams, 10.39 sp. gr., 22.5 mm, reeded edge, 2.05 mm thick. Nearly UNC, prooflike fields. Rare pattern with same obverse as 20 Centavos 1892 and slightly modified reverse. Probably intended to replace the 20 centavos (as was done in 1911,) which was not popular due to being 4/5 of the value of mass circulating Guatemala 2 Reales. An integral part of the history of the coinage of Salvador in 1892-3. VERY RARE..... 650.00

*13. SALVADOR: Peso 1894. Type of Y7, Elizondo 4. TRIAL STRIKE in copper. 21.69 grams, reeded edge. PROOF, with slight evidence of handling. RARE..... 325.00

*14. SALVADOR: Peso 1895. Type of Y7, Elizondo 5. TRIAL STRIKE in copper. 23.50 grams, reeded edge. PROOF, light handling as expected. VERY RARE..... 400.00

*15. SALVADOR: Peso 1904. Type of Y7a with thick, pronounced bust of Colon (Columbus.) PATTERN PESO of the Philadelphia Mint. Pewtar, 20.76 grams, 7.52 specific gravity, 3.0 mm thick (regular issue is 2.5 mm.) Probably a trial strike; Judd lists several patterns in pewtar for the Philadelphia mint during this era. EF-AU, somewhat prooflike. VERY RARE..... 500.00

THE COINAGE OF CENTRAL AMERICA

SECTION II: GOLD COINS

19. GUATEMALA: 4 Reales 1860 Fr-37. VF+, three small digs $15.00, AEF, lustre..... 25.00

*20. GUATEMALA: 10 Pesos 1869R Fr-40. EF..... 275.00

*21. SALVADOR: 5 Pesos 1892 Friedberg 3, Harris 2. 8.03 grams, 17.40 sp. gravity, 21 mm. EF or so for wear, surface and edges have numerous small nicks. Not a superior specimen of this rarity, but certainly acceptable by most standards. Mintage of only 558 750.00

*22. SALVADOR: 20 Colones 1925 Friedberg 5, Harris 5. EF for wear, but the surface has a multitude of small nicks from use on a bracelet. The coin was not attached to its case and thus the rim is decent. 16.75 grams [Both Harris and Almanzar-Stickney erroneously list the weight as 15.56 grams. The coinage law called for 15.56 grams of pure gold with a fineness of 0.900. With the additional weight of the added alloys, the actual coin should weigh between 16.67 and 16.78 grams.] 17.20 specific gravity. VERY RARE with 200 minted. Well worth..... $1350.00

GUATEMALA COUNTERSTAMPS OVER CROWNS

* * * * * * *

*78. "1 Peso Emergency Coinage. On the obverse: struck over a Lima 1822 Piastre [Republic 8 Reales], a small round counterstamp (a rising sun behind three mountains.) On the reverse: a small round counterstamp (with bow, arrow, and quiver behind a five-pointed star and sunface) struck over a crown above 182(4) (this counterstamp applied by the Spanish royalists during the siege of Lima in 1824.) 39 1/2 mm, 26.90 grams, E2-3 [condition is VF-EF,] the c/s is E1 [condition is EF+.]" Brackets are ours.

The above is the description of this coin (translated from German) as described by Weyl when he prepared the Jules Fonrobert collection for auction in Berlin in 1878 (see lot 7390 in the Fonrobert catalogue.)

We could not locate any record indicating the existence of any additional specimens of this double counterstamp. The second c/s - (bow & arrows/sun over 3 mountains) has been considered to be an 1849-50 striking until recently. The earlier c/s has the aforementioned 1824 origin. Considering the intrigue surrounding these particular counterstamps, and recognizing the importance of the fact that this specimen's history can be traced to 1878, we hope this piece eventually becomes part of a major museum group. For the present we offer this possibly UNIQUE and numismatically important item for the conservative figure of.....$1500.00

* * * * * * *

*79. Guatemala and Salvador: Sun over 3 mountains c/s (Guatemala c/s, Elizondo Type 1) and the curious serrated (zigzag) c/s often attributed to El Salvador. Struck over a Peru 8 R. 1839MB. Very Fine or so, rather RARE..... 125.00

*80. Guatemala: Counterstamp of Sun over 3 mountains over a Guatemala cob 8 Reales 1749J. E-Guat 1. The basic coin is nice for the type and the c/s is Very Fine. 26.86 grams..... 100.00

*81. Guatemala: Counterstamp of Bow and Arrow on obverse and Sun over 3 mountains on reverse. Struck over North Peru 8 Reales 1836. 26.92 grams. Coin AVF, c/s is VF-EF. Scarce..... 75.00

The following collection represents 44 of the 62 dates of Chile Pesos and Peruvian Soles that were counterstamped in 1894 by the Guatemalan mint during a serious coin shortage there (hence the label "emergency" or "necessity" coinage.) The c/s on these items is the regular 1/2 Real 1894 of Guatemala. Collectors interested in this series by date should endeavor to view the excellent exhibit of a nearly complete collection now shown occasionally at coinshows in the Eastern United States. It is worth noting that several of these dates are rare and seldom offered.

82. Counterstamp of Guatemala 1/2 Real 1894 over the listed dates of Chile Pesos (see Elizondo, page 192.)

*529. -25 Centesimos 1904 Y-8 UNC, fully lustrous and nice fields. Truly RARE this choice..... 55.00

530. -1/4 Balboa 1931 Y-14 Fine $7.00, Nice A.UNC, rare..... 85.00
531. -1/4 Balboa 1932 Y-14 Strong VF-EF..... 6.50
532. -1/4 Balboa 1933 Y-14 VF, decent..... 3.75
533. -1/4 Balboa 1934 Y-14 EF, toned lustre..... 12.50
534. -1/4 Balboa 1947 Y-14 Nice AU $5.00, AU-UNC..... 8.00
535. -1/4 Balboa 1953 Y-19 BU, significant bagmarks..... 2.50
536. -1/2 Balboa 1930 Y-15 VF $3.00, Lustrous A.UNC..... 20.00
537. -1/2 Balboa 1932 Y-15 Nice EF-AU..... 17.50
538. -1/2 Balboa 1933 Y-15 EF+..... 15.00
539. -1/2 Balboa 1947 Y-15 AU-UNC, some bagmarks but fully lustrous 10.00
*540. -1/2 Balboa 1947 Y-15 Choice UNC, probably the nicest specimen of 1930-1947 we have seen. RARE..... 25.00
541. -1/2 Balboa 1953 Y-20 VF-EF $1.00, UNC..... 2.00
542. -1/2 Balboa 1966 Y-15a Prooflike UNC, struck as a proof but rejected..... 3.50
543. -1/2 Balboa 1966 Y-15a EF, helmet error variety..... 2.50

*544. -1930 Year Set. Silver 1/10, 1/4, and 1/2 Balboa, Y13-15. Toned AU-UNC, none of these three ever circulated..... 100.00

SALVADOR: Proclamations under Spanish Rule:
545. -Proclamation 2 Reales 1808. Grove F176. Bust VII/Volcano. Fine or so, somewhat scarce..... 25.00
*546. -Proclamation 1 Real 1808. Grove F179, Prober 180, Fonrobert 7464. Bust Ferd VII/Volcano. Lustrous EF, pierced. Unpriced in Grove and scarce..... 35.00
SALVADOR: Provisional Coinage 1828-1835:
*547. -Provisional 1/2 Real 1835 C-11. 1.54 grams, 15 mm. Variety with "SAL", no star above mountains. Has "1-1/2" for denomination much like the Venezuela 1/2 Real 1858. This apparent error has no explanation so far. Much rarer than the 1 and 2 Reales. Very Fine and well-struck except for one area near the top. RARE..... 250.00

*548. SALVADOR: Provisional 1 Real 1833 C-14. Variety with "POR LA LIVERTAD DEL SALVADOR" on obverse. Reverse has standard die for the date. The obverse is double-struck. This date is much scarcer than the 1835. F-VF, pierced..... 65.00

*549. -2 Reales Provisional 1833 C-17. 5.28 grams. Unlisted variety; Almanzar-Stickney lists the 9 varieties present in the best collection of these coins. This piece is a logical progression from the final piece in that known group. It has "LIVERTAD" and "SALV" in the obverse legend and 2 inverted "S" and straight waterlines in the field. The reverse has no assayer initials and a wreath beside the liberty cap. VF+, unusually bold but lightly struck near the date..... 95.00

*550. -2 Reales Provisional 1834/3 C-17. Variety with inverted "S" in the obverse field and normal "S" in Provisional. Fine, but pierced. Also has the serrated countermark often attributed to Salvador (as did Fonrobert 4573E, a 2 Reales of 1833.) A very scarce date..... 55.00

* * * * *

551. -4 Reales Provisional (1828). ONE of the FOUR pieces known. This piece is extremely crude and poorly struck indicating the striking facilities were inadequate for this size (32 mm) coin. Of the known pieces this is the only one with the full legends clear from 8 o'clock through 4 o'clock (witness the two excellent photos on page 12 of the Almanzar-Stickney book.) The obverse legend reads "POR LA LIBERTAD SALV" with the final "V" weak. The fineness which should appear from 5 through 7 o'clock is not struck. In the obverse field the "R" for "Reales" is sharp to the left of the center column. The tilted "4" to the right (Type II in Almstickney) is very faint as are the waves and bottom half of the column. The upper half of the column and the liberty cap atop it are bold.

The reverse legend from 8 through 4 o'clock reads "MONEDA. PRO VISIONAL" with all letters bold. This distinguishes this specimen as the only one known with the word "PROVISIONAL" discernable to any degree. The portion from 5 through 7 o'clock which would include the date "1828" is not struck. As is true of the obverse, the smoke cloud portion of the center is bold with the lower half (a volcano) only faintly evident.

By any standard this type coin is an extraordinary rarity. Almanzar and Stickney emphasized this fact by stating "These coins should be considered to be one of the rarest coins of the Americas." 9.32 grams..... $1500.00

* * * * *

SALVADOR: Counterstamps of 1839-1880:

***Numismatists searching for a series that is exciting and rewarding to collect and study should consider the counterstamps of El Salvador. Reviewing the major auctions and research volumes of the past century, one finds numerous references to five different counterstamps, but very little elaboration on their origins. Fonrobert (1878), Ulex (1908), Medina (1919), Duffield (1920), Peltzer (1927), Guttag (1929), and Gibbs (1966) are all important references in studying this series. It is unfortunate, however, that the only reference books readily available to the public today are but cursory, incomplete "samplings" of this series. Since these booklets all cover but two of the five types of counterstamps, we hope to present herein a few notes which will aid collectors in their attempts to uncover the history of these pieces. We do point

out that our knowledge is sketchy, at best, but does represent a synthesis of the information available to us. The chronological order of these counterstamps is indefinite and the order listed below is nothing more than an attempt to convey our opinion of the probable sequence of their application.

TYPE I: Counterstamp of a Triangular Mountain, with "1839" below in a small rectangle. Examples of and references to this c/s include: Coins of the World 1750-1850 by W.D. Craig, pg. 399, top of column 3; Gibbs collection, lot 708; and Almanzar 8/72 auction, lot 2407.

*552. -This counterstamp over a worn and pierced Chile 1/2 Real 1833-34. This counterstamp is scarce over any coin but is VERY RARE over 1/2 Real coins. Our research uncovered only one reference to a 1/2 Real with this c/s. That piece was lot 1404 of the Bignell & Ely Collection sold by Jacques Schulman in Amsterdam in 1911. This is very possibly that coin as it was obtained from the Schulman family. POSSIBLY UNIQUE. The c/s is VF..... 250.00

*553. -Same counterstamp over Peru 1 Real 1828JM. RARE over this denomination. The c/s is a nice F-VF..... 100.00

(NOTE: This c/s is most frequently encountered over 2 Reales coins. It is also known over 8 Reales.)

TYPE II: Counterstamp of a "SAL" monogram in a circle with rays around the border. This is the most obscure of the five counterstamps under consideration. It is, however, pictured or mentioned in: Ulex (1908) lot 2252; Medina (1919) #216; Peltzer (1927) Lot 578; Guttag (1929) #4574B; and Almanzar auction (Aug. 1972) Lot 2413. It is rather infrequently encountered and must be considered rare.

*554. -The above counterstamp over a Salvador provisional 2 Reales 1829. The coin is Fine and the c/s is a rather bold F-VF. RARE..... 200.00

TYPE III: Serrated or Zigzag countermark over various Peruvian and Salvadorian 2 and 8 Reales. This counterstamp is frequently found in combination with the Guatemala Sun & Mountains c/s. It is not known whether this is an official cancellation mark or a private issue. The fact that this c/m is not scarce adds to the likelihood that it is official. It has at least two forms and several different lengths. Some of these c/s are straight lines with triangular zigzags on only one side and some are zigzaged on both sides of the median. Students should note: Gibbs (1966) Lot 707; Guttag (1929) #4573C and 4573E; and Almanzar auction (8/72)#2414.

-We offer three different coins with this countermark. Please see #79, #260, and #550; we pictured all three of these specimens for future reference.

TYPE IV: National Shield counterstamped over various 1/2, 1, 2, 4, and 8 Reales. This is one of the two "common" counterstamps in this series; it is listed in nearly all volumes pertaining to Central American coins (it is interesting to note that one recent booklet calls these "rare.") At least seven different varieties of this c/s exist. It is difficult to accurately compare various pieces as many are poorly struck. We have divided the following 8 pieces into 3 major varieties, or more liberally, types. Some pertinent research is outlined on page 18 of the recent Almanzar-Stickney booklet on Salvador.

569

570

573

573

574

598

606

612

VARIETY I: Shield topped by small, unadorned liberty cap. The flagpoles beside the shield are shorter than on other varieties and veer away from the shield at a larger angle. The most noticable difference is that no small wreath is present 1 millimeter from the shield from 2:30 through 9:30 o'clock.

555. -National Shield c/s, Variety I, over a Mexico Philip II Real, assayer "o" (1556-98.) The basic coin is decent albeit pierced. The 2/3 of the c/s that was struck is discernable. Probably RARE over this cob type..... 35.00

556. -National Shield c/s, Variety I, over a worn and pierced cob 1/2 Real. The c/s is quite worn but fully struck and discernable... 10.00

*557. -National Shield c/s, Variety I, over Guatemala 1/2 Real 1740. The c/s is bold and nearly as struck with slight doubling. The original coin is nice for a Guatemala 1/2 Real with full date and mintmark and a small pierce. Truly spectacular for this c/s which Charles Robinson correctly states "usually appears in a very crude form." Worthy of a museum exhibit..... 75.00

VARIETY II: Shield topped by liberty cap which is flanked by two dates (1503? - 1834?). A separate wreath partially encircles the shield from 2:30 to 9:30 o'clock. The flagpoles end at the side of the small rectangle in the center of the shield. (We know of no previous mention of the fact that some specimens of this c/s have the small dates near the top. Although neither of our two counterstamps are clear enough to read the dates, collectors should begin to search for specimens of this variety with discernable dates. With that fact, the origin of this c/s will be more easily discovered.)

*558. -National Shield c/s, Variety II, over a worn 1806 Real. The c/s is F-VF or so and is the best example of Variety II seen by us. 25.00

559. -National Shield c/s, Variety II, over a worn and pierced 1782 Real. The c/s is very worn but easily discernable..... 10.00

VARIETY III: Shield topped by liberty cap which has about 20 rays around it. A separate wreath lies around the shield from 2:30 to 9:30 o'clock. The flagpoles protrude from the bottom of the center rectangle and continue downward at an angle through the external wreath.

560. -National Shield c/s, Variety III, over a Mexico Real of Carlos & Johanna, (M-L) assayer L. The 2/3 of the c/s struck is VG-F with the basic coin VG+ but twice holed. Not unusually weak for this c/s..... 20.00

561. -National Shield c/s, possibly Variety III, over a Mexico Real of Carlos & Johanna, L-M. The basic coin is VG-F and pierced. The c/s is rather unclear although not very worn..... 15.00

*562. -National Shield c/s, Variety III, over a Mexico 2 Reales 1793. Basic coin is a decent VG. The c/s is somewhat worn but quite clear and desirable..... 35.00

TYPE V: "R" in a circle of beads over various Guatemala 1/2, 1, 2, and 4 Reales and 1 Pesos. The known base coins are dated 1859-1862. At least two genuine varieties of this c/s exist: one has 21 beads and the other has 20 beads. The former has a larger than normal space between the dots by the left top of the "R"; the latter has a more evenly spaced series of beads. This c/s is common

on 1 and 2 Real coins. There are numerous references to this c/s beginning with Fonrobert in 1878, lots 7468-7470.

*563. -"R" in circle of 21 beads over a Guatemala 1/2 Real 1862. Coin is Good; the c/s a bold Fine. VERY RARE over 1/2 Real. Records of existence include the 1908 Ulex auction..... 300.00

*564. -"R" in circle of 21 beads over 1 Real Guatemala 1860. Coin is nearly VF; c/s is bold VF. Superior condition..... 25.00

565. -"R" in circle of 20 beads over 1 Real Guatemala 1861. Coin is Good with minor defects; c/s is bold Fine..... 8.50

*566. -"R" in circle of 20 beads over 1 Real Guatemala 1861. Coin is VG; c/s is F-VF..... 12.50

567. -"R" in circle of 21 beads over 1 Real Guatemala 1861. Coin is AG; c/s is Fine..... 8.50

*568. -"R" in circle of 21 beads c/s over a cut-out head of Carrera from a Guatemala 1 Real. Genuine and rather novel..... 7.50

*569. -"R" in circle of 21 beads over 2 Reales Guatemala 1862. Coin is G-VG with oval hole; c/s is Fine..... 9.00

*570. -"R" in circle of 20 beads c/s over a Guatemala 4 Reales 1861R. Nearly Very Fine, nice and RARE..... 150.00

* * *

SALVADOR: Republic 1889-1973:

571. -Centavo 1889H Y-1 EF+ $3.50, UNC..... 6.50

572. -Centavo 1892 Y-3 The curious "Cap with Plume" type. AEF..... 87.00

*573. -Centavo 1892 Y-3 EF, decent type specimen. Diebreaks throughout the obverse. 4.95 grams..... 90.00

*574. -Centavo 1893 Y-3 Very Fine, light surface corrosion from burial. "3" in date has thick right portion unlike Almanzar 8/72 auction specimen. Overall acceptable and VERY RARE with 3-4 known. 4.92 grams..... 325.00

575. -Centavo 1915 Y-16 F-VF $2.00, Very Fine..... 3.00

576. -Centavo 1919 Y-16 Fine $1.00, Bold EF+..... 6.50

BIBLIOGRAPHY

The nineteen reference volumes listed below were used in preparing this catalog. Collectors and researchers interested in further study should give serious consideration to each of them. After listing each, we attempted to note if the particular volume is presently available; while we are not in the business of selling books, we will make an effort to obtain copies of any item listed with a price for collectors who could not otherwise obtain them. Furthermore, may we suggest that collectors and researchers retain this catalog as it includes much data not to be found in any of these other books.

1. Almanzar, Alcedo. Auction featuring Latin American coins, San Antonio, August, 1972. (Available for $2.00)

2. Almanzar, Alcedo and Brian R. Stickney. The Coins and Paper Money of El Salvador, San Antonio, Texas, 1973. (Available at $3.00.)

3. Duffield, F.G. A Trial List of the Countermarked Modern Coins of the World, Numismatist Reprint (1962) of the original 1920 listing. (Frequently available for $1.00)

4. Elizondo, Carlos A. Eight Reales and Pesos of the New World, San Antonio, Texas, 1971. (Available for $12.50)

5. Fonrobert, Jules. His auction as cataloged by Adolph Weyl and sold in Berlin in 1878. (A reprint is available for $15-20.)

6. Gibbs, Howard D. His collection of counterstamped and necessity coins of the Americas as auctioned by Hans Schulman, New York, 1966.

7. Grove, Frank W. Medals of Mexico, Volume I, Medals of the Spanish Kings, California, 1970. (Available at $12.50.)

8. Gurdian, Raul. Contribution al Estudio de las Monedas de Costa Rica, San Jose, Costa Rica, 1958. (Sometimes available at $10-15.)

9. Guttag, Julius. His collection catalog as prepared by Edgar H. Adams, New York, 1929. (Sometimes available at $100-150.)

10. Harris, Robert. Modern Latin American Coins, Racine, Wisc. 1966.(1.50)

11. Peltzer, Richard F. Catalog of the Peltzer Collection of American Coins, Glendenings, London, June, 1927.

12. Prober, Kurt. Historia Numismatica de Guatemala, Guatemala City, 1957. (Sometimes available for $10-20.)

13. Prober-Noronha and Babbitt. Their Central American coin collections as sold by Henry Christensen, New Jersey, Dec. 6, 1963. (This catalog is sometimes available for $3-5.)

14. Robinson, Charles M. III. The Coins of Central America, 1733-1965, San Benito, Texas, 1965.

15. Soley-Güell, Tomes. Historia Monetaria de Costa Rica, San Jose, Costa Rica, 1926.

16. Stickney, Brian R. Numismatic History of Republic of Panama, San Antonio, Texas, 1971. (Available $3.00.)

17. Ulex, George F. His collection catalog auction by Adolph Hess & Co., Frankfurt, May, 1908.

18. Wallace, Holland. Central American Coinage Since 1821, Weslaco, Texas, 1965. (Available at $2.50; probably the best reference work on this series although a second edition is badly needed.)

19. Zelaya, M.A. Apantes Para la Historia de la Moneda en Honduras, Tegucigalpa, 1958.
